

CERTIFICATE OF VERIFICATION

AI-Powered Environmental Verification Platform

This certificate confirms that the submitted evidence has been analyzed using VisionLedger's AI verification engine and permanently anchored on the Ethereum Sepolia blockchain.

Certificate Information

Certificate ID	CLM-556DC5
Claim ID	87ee0d2b-3810-4550-b3f0-582c9bd9c22c
Claim Type	Construction Progress
Verification Status	Verified
Confidence Score	90.0%
Estimated Quantity	N/A
Issue Date	July 10, 2026
Verification Time	15:51:18 UTC

AI Verification Summary

Reasoning:

The image clearly shows an active construction site with a partially completed multi-story concrete building and two tower cranes, which supports the general claim that construction progress is occurring.

Detected Objects:

multi-story building, tower crane, concrete structure, rebar, formwork, columns, sky

Limitations:

The image is a single snapshot and does not provide specific data on the percentage of completion, specific milestones, or dates. It cannot verify the exact stage of progress claimed without a baseline or schedule.

Recommendation:

Request detailed progress reports, milestone checklists, or a series of dated photos to verify specific percentages and stages against the official construction schedule.
